

CARE CENTER FOR SEA TURTLES guided visits

Tél : +33 (0)4 67 56 42 00

55, rue du port - 34280 LA GRANDE MOTTE

Email : contact@lagrandemotte.com

Site internet : <https://www.lagrandemotte.com/>

In La Grande Motte, the rehabilitation center for marine turtles from bycatch was created to verify that marine turtles are still able to swim and eat by themselves after being nursed in the rescue center. The rehabilitation center is fenced in a sea inlet between the Ponant pond and the Mediterranean Sea. Our turtles are observable from April to October when they come to the surface to breathe.

Annual closing :

Closed from October to March for paid services

The educational trail along the Ponant pond is open and free all year long

Location : On the outskirts, Montpellier - Petite Camargue

Languages spoken : English

Prices

Groupes : min. 15 pers.

max. 30 pers.

Prices 2021 :

- Guided visit (group price) : groups from 140 €

Activities / products

average length of time : 1:30 hour

Activities :

Different activities are suggested depending on age:

? A guided tour of the rehabilitation center recommended to teenagers and adults but open to kids too. A keeper will explain why sea turtles are threatened, how the CESTMed protects them and many anecdotes about their life style. From 6 years old.

? 'naturalist' activity (8-11 years old): what do sea turtles eat? What eat them? Can you recognize all plants and animals that surround them? How do they breathe and breed? You will have to listen carefully to challenge the final game and find the hidden treasure of the Ponant pond?

? 'turtle hospital' activity (5-9 years old): they will put themselves in turtle keepers' shoes and try to take care of their turtle toy
