Foremost choice for conference events in France, the Corum is a pioneering concept linking two worlds in a same location: prestigious professional events and classical or contemporary music (Opera Berlioz, part of the Corum, is well-known for its fine acoustic qualities and its National Orchestra). The site houses a state-of-the-art multi-stage and is at the very heart of the town centre, receiving up to 3000 people for meetings or concerts. The basement of the building is a car park and aligns with tramway and bus stations connecting to the main hotels in Montpellier. Major roads link the town with beaches, and the airport is less than a quarter of an hour away.
