Discover Hérault with our guides through original activities: canyoning, rock-climbing and via ferrata allow you to immerse yourself in the heart of the natural Hérault's massifs and enjoy yourselves together by doing outdoor sports. With canyoning, you will descent rivers by foot. This will leave to the groups good memories of mutual aid and understanding by the pleasure of crossing the obstacles together.

The via ferrata allows to go easily on the cliffs by an aerial route traced to facilitate the progression thanks to cables, bars, 'tyroliennes' and bridges of monkeys.

Discovers a technical activity on Hérault's cliffs by rock-limbing, an activity of mutual aid.
