The Saint Chinian cellar is without any doubt one of the loveliest wineries in the South of France. Its history is closely related to the land of Oc, a wild humming aromatic land where every year produces vintages which are delightful, original and balanced.

You will discover L'Art en Cave, a unique concept that combines the work of a contemporary artist with an exceptional 'cuvée'.

During this event, a fresco is made on one of the tanks of the cellar and will be reproduced on the label of a bottle of wine. The inauguration of the new frescoes is still taking place on the first Friday of August during the open house days.
