Site internet : <http://lessensdes5continents.fr/>

Between Nîmes and Montpellier, beside the 'Petite Camargue', discover this floral park, a landscape created in the spirit of 'Feng Shui'; a botanical garden featuring drought-resistant plants from the Mediterranean climate zones of the 5 continents.

It brings together about 2,000 varieties of listed plants, including a collection of mimosas tolerant to -11°C, plus ornamental and edible plants ? a breath of Asia in a Mediterranean landscape, a re-creation of bushland of the southern hemisphere, gardens on slopes and between rocks... a superb and different scenery that's unique to Europe, and a wonderfully peaceful environment.

**Annual closing :**

Closed on Sundays from November to March

Closed on Sunday mornings from April to October
